

MY BENEFITS WELCOMES DYNAMIS: THE REAL-TIME DATA PLATFORM

► Exciting News

MY BENEFITS has partnered with Dynamis, the cloud native, Soc 2 compliant platform that provides automated access to plan sponsor census, payroll and paycheck data.

The traditional back and forth work of pulling and sharing reports to ensure regulatory compliance is now a thing of the past. This two-minute video explains how Dynamis works, and how it will reduce your overview as an employer as you administer your firm's retirement plan.

[Watch the video](#)

► Data Security on a regular cadence

- Dynamis is a SAAS-based platform that runs on Microsoft Azure. The platform includes the most sophisticated security currently available.
- All personally identifiable information (PII) is protected within four layers of security:
 - i. **Network Security:** Firewalls to restrict access to services;
 - ii. **Access Management:** Login access to the level of the Dynamis software and at the level of your individual account, ensuring that only appropriate representatives of MY BENEFITS can access your census data;
 - iii. **Threat Detection:** Audit logs that capture how and when your data is being accessed;
 - iv. **Information Protection:** All data is encrypted within the system, physical access to the data is constrained, and data is backed-up on a regular cadence.

► Next Steps

- MY BENEFITS will send an email with easy, step-by-step instructions on how to link your payroll system
- Dynamis programmatically accesses payroll using its secure API
- Data is automatically transferred to the Dynamis platform where MY BENEFITS manages your plan's compliance needs
